SUMMARY

Software Developer with **4+** years of experience building secure, scalable web applications using **Angular, Reacts Js, JavaScript and TypeScript**. Strong expertise in **Component-Based architecture, reactive forms, state management, RESTful API integration, and frontend performance optimization**. Familiar with Angular concepts and migration strategies. Experienced in enterprise and banking applications with strong problem-solving and collaboration skills.

SKILLS

- **Frontend Technologies** : Angular (v10+), Angular JS, React Js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Angular Material, RxJS, NgRx, Observables
- **Backend Technologies** : Node.js, REST API, JSON, MySQL, Mongo DB
- **Architecture & Design** : Component-Based Architecture, Modular Architecture, Lazy Loading, Routing, Enterprise Application Architecture, Micro Frontend Architecture, Software Design Patterns, Code Reusability and Standardization
- **Forms & State Management** : Reactive Forms, Template-Driven Forms, Advanced RxJS Patterns, State Management using NgRx, Redux, Observables and Subjects
- **API & Data Integration** : RESTful APIs, HTTP Interceptors, JSON Data Mapping, JWT Authentication, OAuth2, Secure Data Handling
- **Performance Optimization** : Angular Change Detection Strategies, Performance Tuning, Load Optimization, Code Refactoring
- **Testing & Quality Assurance** : Jasmine, Karma, Unit Testing, Test Automation, Code Quality Enforcement, Peer Code Reviews
- **Development Tools** : Angular CLI, Git, CI/CD Pipelines, VS Code, Webpack, Git Bucket
- **Deployment & Cloud** : Oracle WebLogic Server, AWS (S3, EC2, Lambda, CloudFront, CodePipeline), Docker, Container Deployment Fundamentals
- **Methodologies & Processes** : Agile, Scrum, Sprint Planning, Requirement Analysis, Functional and Technical Design, Risk Assessment, Delivery Tracking
- **Leadership & Collaboration** : Mentoring and Guiding Developers, Cross-Functional Team Collaboration, Technical Documentation, Task Estimation, Conflict Resolution, Technical Decision Making

WORK EXPERIENCE

Software Developer | Rumango Software & Consulting Services Pvt. Ltd. | May 2025 – Present

- Led end-to-end development of enterprise-grade full-stack applications using Angular (v10+), TypeScript, Node.js, and RESTful APIs, collaborating closely with product, backend, and QA teams, improving overall system efficiency by 18%.
- Designed and implemented modular, component-based frontend architecture and REST API integrations, significantly improving code reusability and reducing development timelines by ~2 weeks per release.
- Developed reusable UI components and shared modules using Angular, SCSS, Angular Material, and integrated them with backend services through secure REST APIs.
- Implemented JWT-based authentication and OAuth2 authorization for secure communication between frontend and backend services.
- Integrated backend APIs using Angular HTTP Interceptors, RxJS, and JSON data mapping, ensuring reliable data flow, error handling, and secure data transmission.
- Optimized application performance using lazy loading, Angular change detection strategies, and code refactoring, reducing application load times by up to 70%.

- Built and maintained automated unit tests using Jasmine and Karma while mentoring 7 junior developers, conducting code reviews, and enforcing coding standards—resulting in 80% fewer production defects and 70% improvement in team productivity and code quality.

Associate Software Developer | August 2022 – April 2025

- Developed and maintained secure banking and enterprise applications using Angular, React Js, Node.js, and RESTful APIs, supporting role-based access and transaction workflows.
- Built responsive, reusable UI components and reactive/template-driven forms using Angular, HTML5, SCSS, and Angular Material for complex business processes.
- Integrated frontend with backend services using REST APIs, JWT authentication, JSON mapping, HTTP interceptors, and RxJS-based state management, optimizing performance and API efficiency.
- Collaborated with cross-functional teams in Agile/Scrum, managed code via Git and CI/CD pipelines, and contributed to stable, on-time releases.

Trainee Engineer | May 2022 – July 2022

- Developed responsive UI components for banking and e-commerce applications using Angular, HTML5, CSS3, Bootstrap, and JavaScript, integrating REST APIs and rendering JSON-based data.
- Implemented basic reactive forms and validations, collaborated with cross-functional teams using Git, and gained exposure to enterprise architecture, Agile processes, and coding best practices.

PROJECTS

ICust: (Banking Application)

- Built a secure, role-based banking web application using Angular & Angular JS, supporting multiple user roles and transaction types.
- Integrated JWT authentication and RESTful APIs, ensuring robust security, seamless access control, and reliable data flow.
- Developed modular, reusable components with lazy loading to improve maintainability and application performance.
- Implemented dynamic, reactive forms validations for transaction processing & account management.
- Managed state and real-time updates using RxJS and Angular services, ensuring consistent data across modules.
- Optimized UI/UX with Angular Material and responsive design, delivering seamless experience on desktop and mobile devices.

Median: (Middleware Applications)

- Worked on an enterprise middleware platform (MEDIAN) used by banks to convert and process XML, JSON, CSV, Excel, and Flat File data across multiple systems.
- Developed Angular-based screens for easy configuration and management of interfaces using reactive forms and reusable components.
- Integrated frontend modules with REST and SOAP services to support secure and reliable data flow between systems.
- Implemented audit and monitoring features to track transactions, interface status, and system health.
- Fixed UAT and production issues, performed unit testing, and delivered changes on time in an Agile environment.

ExpressBees – Logistics Management Platform

- Developed a React.js dashboard with real-time package tracking and responsive UI using Material-UI.
- Integrated REST APIs with Redux for efficient state management and smooth data flow.
- Optimized performance using lazy loading, asynchronous data fetching, and reusable React components, enhancing user experience.

EDUCATION :

Master of Computer Application - College of Engineering and Technology | August 2019 – April 2022
